PROFILE SUMMARY

Full Stack Developer (MERN) with 1.5+ year of experience in building responsive and user-friendly web applications. Skilled in React, Next.js, Node.js, Express.js, and MongoDB with experience in REST API development and state management. Strong understanding of modern JavaScript (ES6+) and component-based architecture. Passionate about writing clean, scalable, and maintainable code while continuously improving problem-solving skills and learning new technologies. Open to both on-site and remote opportunities to contribute to impactful and real-world projects.

CAREER SUMMARY

Full-Stack Developer Spark Tech Agency

March 2025 - Present
Dhaka, Bangladesh

- Wuffoos (wuffoos.com): Architected a responsive pet care platform using Next.js and React.js; collaborated with the backend team to seamlessly integrate Node.js/Express REST APIs with frontend data fetching.
- Leveraged Next.js features (Server-Side Rendering & Static Generation) to optimize performance, significantly improving Core Web Vitals and SEO rankings.
- Streamlined complex state management using Redux Toolkit and integrated real-time Socket.io chat interfaces for enhanced user engagement.
- Built secure, client-side authentication flows using JWT, ensuring robust protection for private user routes and sensitive pet data.
- Worked in an agile environment, collaborating with designers and backend engineers to translate Figma mockups into scalable, production-ready code.

Frontend developer (Remote) Legier Beteiligungs

May 2025 – Feb 2026
Germany

- Newspaper Platform (legiergroup.com): Developed a high-performance, responsive frontend for a digital newspaper, focusing on optimized content delivery and user engagement.
- Scandic Coin (scandiccoin.dev): Built a modern UI for a crypto-currency platform. Integrated Web3.js for secure wallet connectivity and used Redux Toolkit for efficient state management.
- SNC-DOMAIN: Led the frontend development for the SNC-DOMAIN web portal, ensuring seamless navigation and a premium user experience across all devices.
- Performance Optimization: Improved web performance and SEO for all managed projects, resulting in faster load times and better accessibility.
- Remote Collaboration: Worked effectively in a distributed team environment, utilizing modern communication and version control tools (Git) to meet project deadlines.

SKILLS

- Skilled in building modern web applications using HTML, CSS, JavaScript, and TypeScript
- Front-End Frameworks: React.js, Next.js
- State & Data Management: Redux Toolkit Query (RTK Query), TanStack Query, Axios
- Backend & API Development: Node.js, Express.js, RESTful APIs, JWT Authentication, MongoDB
- Cloud & Deployment: AWS, Vercel, Firebase
- API Testing Tool: Postman, swagger
- Component/UI Libraries: @shadcn/ui, Ant Design (AntD), DaisyUI, Chakra UI
- Form Validation: Zod
- Version Control: Git, GitHub
- Key Skills: Problem Solving, Debugging, Responsive UI, Cross-Browser Support, CORS

PROJECTS

Name: Wuffoos

[🔗 Live Link](#)

Developed a scalable full-stack pet care platform that allows pet owners to discover pet-related services, manage pet profiles, book appointments, and interact with service providers through a modern, secure, and responsive web application designed for an enhanced user experience.

Key Features & Highlights:

- Pet & Service Management: Allows pet owners to create/manage pet profiles and discover pet-related services seamlessly.
- Appointment Booking & Admin Panel: Integrated a booking system for appointments with service providers alongside a dedicated admin interface for managing the platform.
- Advanced State Management: Integrated RESTful APIs using Redux Toolkit (RTK Query) for efficient state management and data fetching.
- Performance & SEO Optimization: Enhanced application performance utilizing Server-Side Rendering (SSR) and Static Site Generation (SSG) to boost SEO and Core Web Vitals.
- Agile Collaboration: Worked closely with backend developers and UI/UX designers in an Agile environment to deliver production-ready features.

Name: Global News

[🔗 Live Link](#)

Developed and maintained a modern corporate website for LEGIER Media Group, an international media and technology company headquartered in Berlin. The platform showcases the company's global media network, business divisions, and corporate services through a responsive, SEO-optimized, and multilingual web experience.

Key Features & Contributions:

- Responsive UI & Components: Developed responsive and reusable UI components using Next.js, React.js, and TypeScript with cross-browser compatibility across desktop, tablet, and mobile devices.
- Multilingual & Dynamic Content: Built multilingual pages with localization support, integrated APIs, and managed dynamic content for multiple business divisions.
- Performance & SEO Optimization: Optimized website performance using Server-Side Rendering (SSR) and SEO best practices to ensure high Core Web Vitals.
- Architecture & Collaboration: Implemented a scalable component architecture and collaborated closely with designers and stakeholders to deliver production-ready features in an agile environment.

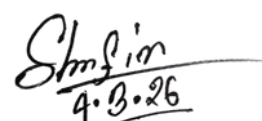

EDUCATION

B.Sc. in Electrical and Electronic Engineering (EEE) — University of Scholars

2025 | CGPA: 3.25

ADDITIONAL INFORMATION

- Languages: Bengali (Native), English (Professional Working Proficiency)
- Interests: Open-Source Contributing, UI/UX Design Trends, Exploring Emerging Web Technologies.
- Availability: Open to relocate or work remotely.
